2023 **PRODUCT CATALOG**

FEEL THE DIFFERENCE.

TO OUR CUSTOMERS:

Hello and thank you for taking the time to check out our 2023 catalog. We appreciate the opportunity to earn your business and for your interest in our products. As we move into the new year, we are excited to debut our 2023 line of products. We've added some new items and continue to offer the most extensive line of muzzleloading products available.

The NitroFire® continues to be the most innovative muzzleloader on the market. Traditions® helped to pioneer this technology in collaboration with Federal Premium® and Hodgdon® and we are so proud of this product. Many states have legalized the NitroFire®/ Firestick™ system for use during the muzzleloading season and we continue to work with remaining states to review the technology. Traditions® has always been on the forefront of innovation and we continue to focus on that. As hunters and shooters ourselves, we take that approach to all of our products and how we can make time in the field better.

While we are focused on innovation, Traditions® continues to offer a full line of muzzleloading products. For 2023, we have introduced the ShedHorn™ muzzleloader for all sidelock enthusiasts. With some states offering heritage or primitive seasons, the ShedHorn™ fits the criteria for these seasons and is a lightweight, accurate option. Even though it is primitive, the ShedHorn™ is outfitted with more modern features like a 1:28" twist, Chromoly steel barrel, and Premium CeraKote Finish. Additional features like a musket ignition and double set trigger, set the ShedHorn™ apart from the other sidelocks Traditions® offers.

Traditions has also introduced for 2023 two new bullets in our popular Smackdown® bullet line. The Smackdown® MZX™ bullet is a full bore bullet which is a great choice for those who prefer a sabot-less projectile or may be in a state where you cannot use sabots and don't want to compromise on performance. We've also introduced the Smackdown® Bullet in 45 caliber which performs exceptionally in our 45 caliber muzzleloaders. Check out pages 42-43 for more information on our bullets.

If you haven't done so already, be sure sign up to receive our emails so that you'll be the first to get Traditions® information. You can also visit our website which has tons of great information like product manuals, FAQ, ballistic information, How To videos and more. If you aren't following us on Facebook, Instagram, and YouTube go give us a like/follow. We are sharing success stories, tips, and so much more on these social platforms. If you have success in the field, send us an email! You may end up in our next catalog!

Thanks for taking the time to check out our catalog. I appreciate your time and hopefully your business.

WHY BUY TRADITIONS®

PERFORMANCE, VALUE & QUALITY.

Each year, the Traditions® team works to develop the most innovative & user-friendly firearms. Like you, we are hunters & shooters & understand what you are looking for in a firearm. We continue to take innovation to the next level by developing cutting-edge technology & have been recognized for this innovation with numerous awards and accolades.

WHY BUY TRADITIONS

VAPR™ TWIST BARREL

The VAPR™ Twist Barrel provides a 1:24" twist rate, which is a faster twist than the 1:28" that was previously on the NitroFire®, Vortek StrikerFire® and Pursuit™ series. The faster twist will stabilize bullets, increase accuracy, and expand the range of bullet options that can be shot out of these muzzleloaders.

TRADITIONS® & ACCURACY.

Traditions® consistently produces some of the most accurate muzzleloaders on the market. Many of our firearms are outfitted with features that provide proven accuracy well beyond 200 yards. You can rely on your Traditions® muzzleloader to be dead on accurate.

LIFETIME LIMITED WARRANTY.

At Traditions®, we believe in the quality, performance & value of our firearms. We stand behind our products & that's why we back all of them with lifetime limited warranties.

SAFETY IS ALWAYS FIRST.

Traditions® has put safety first & foremost when developing our muzzleloaders. Many of our firearms come with a Dual Safety System which is only on Traditions® firearms. You will not see this level of safety on our competitor's guns. The Vortek StrikerFire® & the Vortek StrikerFire® LDR models are outfitted with a trigger block safety & an internal striker block safety. The NitroFire®, Pursuit™ XT, Buckstalker™ XT, Crackshot, and Outfitter G3 feature the Elite XT™ Trigger system with a rebounding hammer and manual cross block trigger safety. Traditions® has made safety standard & a priority in our firearms.

TRADITIONS® TECHNOLOGY

STRIKERE FIRE SYSTEM

No more external hammer! Simply slide the striker button forward until it locks & the rifle is cocked. This system allows for faster lock time, a crisp trigger, the ability to mount your scope closer to the bore & also operate with less weight.

ELITE XT™ TRIGGER

The Elite XT™ trigger system has a precise and accurate trigger pull, rebounding hammer, and a manual cross block trigger safety. Available on Outfitter G3, Crackshot XBR, NitroFire®, Pursuit™ XT, and Buckstalker™ XT models.

TAC2™ TRIGGER

This clean-breaking, two-stage, creep-free, competition-style trigger is set to be accurate and consistent. It is only available on Vortek StrikerFire® models.

QUICK-T™ RAMROD HANDLE

The Quick-T™ Ramrod Handle functions like a palm saver & a t-handle all in one! The Quick-T™ Ramrod handle is available as an accessory or in a package with the replacement ramrod to fit your Traditions® muzzleloader!

ACCELERATOR BREECH PLUG™

The Accelerator Breech Plug™ removes easily by hand in just three full turns. To clean your muzzleloader or remove a load from the barrel, simply twist the breech plug three full rotations & it's out! The Accelerator Breech Plug™ makes use of a flat face for even more consistent ignition & a heavy-duty O-ring that eliminates blow back.

DUAL SAFETY SYSTEM

Incorporates two safeties, making equipped break actions some of the safest muzzleloaders available. The trigger block safety is the most apparent as it is positioned on the trigger guard, like many centerfire rifles. The second safety is an internal hammer block safety that prevents the hammer from engaging the firing pin unless it has been manually cocked.

PREMIUM CERA KOTE COATING

Premium CeraKote Coating is 50x more corrosion resistant than stainless steel barrels. The Premium CeraKote Coating on both the barrel & frame was designed to provide a high quality, long lasting coating, with high corrosion protection & durability.

SPEED LOAD SYSTEM

This system allows for a bullet that is perfectly centered with the barrel rifling, allowing you easier bullet starting & more consistent groups.

NITROFIRE[®] TECHNOLOGY

ELITE XT™ TRIGGER

The NitroFire[®] is equipped with Traditions[®] Elite XT™ trigger system. The Elite XT™ trigger system is designed with a rebounding hammer and a manual cross block trigger safety. The Elite XT™ trigger allows the action to be broken open with the cross bolt safety engaged which allows you to insert or remove your Firestick™ and view the chamber.

FEDERAL PREMIUM[®] FIRESTICK™

CONSISTENT, ACCURATE SHOTS

The Firestick™ is factory-manufactured and precision-measured so it will have the exact same load based on the selected powder charge every time. No inconsistency and no more wondering about how many pellets or grains you should use. Consistency leads to reliable accuracy. You'll be using the exact load that is recommended for your NitroFire[®]. The system delivers convenience too. No hassles of pouring powder or playing with pellets. And, once you've shot your NitroFire[®] muzzleloader, simply throw away the used Firestick™.

CLEANER & CLEAN BURNING

The NitroFire[®] muzzleloader does not have a breech plug. You no longer have to remove your breech plug and make sure the fire channel is clear. There won't be inconsistency due to fouling in your breech plug. This allows for increased accuracy and improved reliability. The Firestick™ is loaded with cleaner-burning Hodgdon Triple 8 powder which will provide less fouling compared to other powders on the market.

SAFETY IS A #1 PRIORITY

Traditions[®] has always made safety a priority. The NitroFire[®] muzzleloader incorporates the Firestick™ system which eliminates accidentally overcharging the firearm. Only one Firestick™ can fit into the breech and since it is pre-measured all of the guesswork has been removed. The NitroFire[®] can easily be uncharged when crossing a fence, climbing into a treestand, or getting into a vehicle.

MOISTURE? NO PROBLEM!

The Firestick™ is impervious to moisture so there is no longer a worry about powder becoming inert due to condensation or weather. You can rely on the Firestick™ inside your NitroFire[®] muzzleloader to remain consistent every time no matter what Mother Nature throws at you. Any unused Firestick™ can also be stored for later use.

REVOLUTIONARY BEGINS WITH TRADITIONS[®]

Traditions[®] has been a leader in the muzzleloading industry for years with their innovation. The NitroFire[®] is the first and best muzzleloader on the market that uses the Federal Premium[®] Firestick™. Traditions[®] has teamed up with Federal[®] and Hodgdon[®] to change muzzleloading forever with this revolutionary platform. The Firestick™ is an encapsulated powder charge containing Hodgdon Triple 8 granular powder. It provides better consistency, improved reliability, increased safety, and is impervious to moisture. This encapsulated powder charge is available in different pre-measured charges. Simply load your bullet from the muzzle and seat it on a shelf within the barrel. This shelf provides a consistent seating point for the bullet. Break open your NitroFire[®] and insert your Firestick™ into the breech. Once inserted, place a 209 primer into the primer pocket of the Firestick™ and close the action. Your NitroFire[®] is now loaded and ready to go! Traditions[®] NitroFire[®] muzzleloader helps to make muzzleloading safer, easier, and more consistent. Join the NitroFire[®] revolution!

PURSUIT[™] XT

The Pursuit[™] series has long been a fixture in Traditions[®] line. Outfitted with the VAPR[™] Twist barrel, it has a 1:24" twist on the .50 caliber models and a 1:20" twist on the .45 caliber models. The faster twist will stabilize bullets, increase accuracy, and expand the range of bullet options that can be shot out of the Pursuit[™] XT. Additionally, the Pursuit[™] XT has been upgraded to the Elite XT[™] Trigger system which has a precise and accurate trigger pull, rebounding hammer, and a manual cross block trigger safety. These upgrades along with standard features like the Chromoly steel barrel, Dual Safety System, and Speed Load System make the Pursuit[™] XT the most feature-rich mid-level option on the market.

CRACKSHOT™ XBR™

Traditions® Crackshot™ XBR™ is the ultimate package which comes with a .22 caliber single shot Crackshot™ rifle, arrow-launching XBR™ upper, 4x32 scope, and three Traditions® Firebolt™ Arrows. This gun is lightweight and easy to carry. This firearm features the Elite XT™ Trigger system which has a precise and accurate trigger pull, rebounding hammer, and manual cross block trigger safety. The XBR™ system allows you to shoot an arrow out of your Crackshot™ rifle and changes your platform into a whole new gun! The XBR™ upper features an inner barrel which you slide the hollow end of your Traditions® Firebolt™ 2216 aluminum arrow over until it reaches the end of the barrel. The inner barrel is protected by an outer shroud. Simply load your arrow, break open the action, and put in a .27 caliber Traditions® XBR™ Powerload. Continue by closing up the action, taking the safety off, cocking the hammer, and firing at your target. You'll experience increased accuracy thanks to the arrow being pulled from the front and this rifle has roughly a decibel of 85. With up to 385 FPS, this package is excellent for adults, youth, and anyone who may be disabled.

STARTER & BLANK PISTOLS

COMPETITIVE STARTER GUN FIRES 209 SHOTGUN PRIMERS.

A blank pistol with the strength to stand up to frequent use & for those who prefer a larger, more hand-filling pistol. This deluxe blank pistol has the heft & balance of many conventional pistols. A solid barrel with a red plug identifies that the barrel is safe & is not a real gun. The cylinder swings out for loading the five (5) 209 shotgun primers. Comes in a handy plastic, foam lined storage & carrying case.

SNAP CAPS

Snap caps are made to protect your firearms by relieving the stress on your firing pins & firing pin springs. When you safely store your unloaded gun, put a snap cap in the chamber & fire your gun to allow the firing pin to lay at rest. This will help prevent firing pins from breaking in the future.

Snap caps are also a great tool to practice dry firing your guns to teach safe gun handling, improve your shooting skills & tune your trigger.

BLACK POWDER REVOLVERS

YANKEE REVOLVERS

Union Army soldiers relied on many different types of sidearms for short range & close quarters combat. The revolver was unique in that it had the ability to fire several rounds per minute before having to reload. Revolvers were typically issued to officers & mounted soldiers, however some were purchased privately or found on the battlefield by infantryman. The 1851 Navy Revolver is distinguished by it's octagonal barrel & lever style loader. The 1851 helped to begin both the expansion of the West & the Civil War. The 1851 Navy is commonly considered to be one of gunfighter "Wild Bill" Hickok's favorite handguns.

REBEL REVOLVERS

Although the resourcefully equipped Confederate soldier could not compete with Union repeating rifles, it was a different story when it came to revolvers. These handguns did not typically require special ammunition, making them easy for Southern troops to acquire & operate.

1858 NEW ARMY REVOLVERS

Designed to be the future of revolvers, the top strap, full frame design made the 1858 New Army Revolver one of the strongest available. During the Civil War, its 8" barrel (with the exception of the 1858 Bison Revolver) & reliability made it highly sought after.

1858 BISON

This modern interpretation of the Model 1858 brings a new dimension to black powder revolvers. The 12" octagonal barrel & adjustable sights makes the Bison different from all the rest.

1860 ARMY REVOLVERS

Recognized as the mainstay of the Union Army, the 1860 was ordered to fill the ranks. The .44 caliber revolver was as powerful as it was popular. After the Civil War, 1860 revolvers could long be found in Army posts & across the Frontier.

SINGLE ACTION REVOLVERS

FRONTIER SERIES

The Frontier Series showcases all of our top quality features & finishes. We offer our 1873 Single Action revolvers with your choice of blued, nickel, or color-case hardened frames & blued or nickel barrels, all polished to perfection. Additionally, you can select from white PVC or walnut grips. The Frontier Series revolvers are truly shooting works of art & will look great at the range or on display in your home. Again, these revolvers come equipped with the transfer

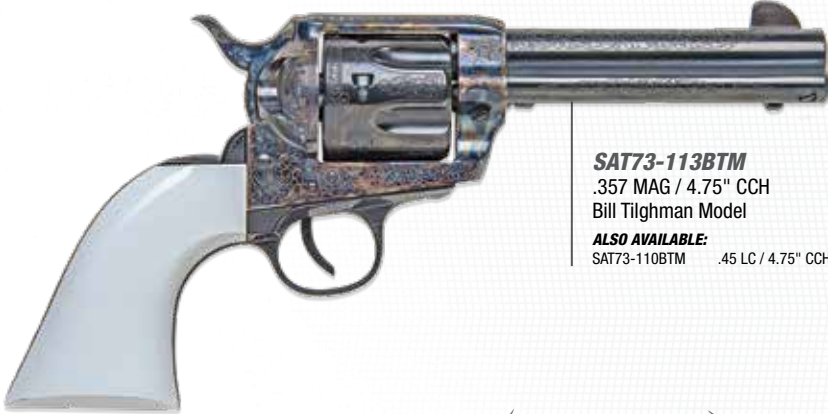

bar safety system to give you the highest level of safety possible. Traditions® takes great pride in offering authentic replicas of perhaps the most famous handgun ever made. The 1873 Single Action Revolver has only slight variations from the 1873 Colt Single Action Army Revolver, arguably the best selling pistol ever produced. This six shooter from the Old West was the favorite of Wild Bill Hickok, Wyatt Earp, Calamity Jane & many other notorious frontiersmen.

HAWKEN™ WOODSMAN RIFLE

Hawken™ Woodsman is a serious hunting rifle. The Woodsman has the classic styling & handling of the time-honored Hawken™ while offering great performance & affordability. Both the percussion & flint models boast a hooked breech for easy barrel removal, click-adjustable rear hunting sight, double-set triggers in an oversized glove-fitting trigger guard with finger rest & an inletted solid brass patch box.

R2090C

PENNSYLVANIA RIFLE

This historically accurate rifle recreates the finest features of the classic long rifles. In flintlock & percussion models, it features a full length walnut stock with cheekpiece, solid brass patch box, stock inlay ornamentation & toe plate. Double-set triggers. Adjustable primitive-style rear sight. Custom detailing throughout, without custom cost.

R9250801

MOUNTAIN™ RIFLE

Based off of a Jacob & Samuel Hawken design, the Mountain Rifle was the inseparable companion of fur trappers & American explorers alike. Part of the "plains rifle" family, the Mountain Rifle could be found on the horsebacks of fur trappers looking for beaver & other pelts thanks to its long barrel which enabled this rifle to take targets at longer distances. While the original had a rust brown finish on the barrel, Traditions has selected a Brown CeraKote Finish which replicates this finish while providing increased corrosion resistance. The Patch Box, custom scrolled trigger guard, & many other features make this a gun you'll want to add to your collection.

P1100

TRAPPER PISTOL

Most of the early mountain men & traders carried a single-barreled pistol & they were popular for years. These pistols had proven themselves reliable, & that was of great importance to a trapper who might have to stake his life on a pistol's ability to provide a back-up shot in what could be a desperate situation. The Trapper pistol's primitive-style adjustable rear sight, octagonal barrel & double-set triggers (capable of firing set or unset) allow you to predictably put your shots on target.

P1060

KENTUCKY PISTOL

A classic American pistol, the Kentucky was a must have for American Pioneers & early 19th Century Explorers. The Kentucky was made famous by the battle of New Orleans & favored by Davy Crockett. It was a favorite because of its one piece stock with superb balance & features like a birds head grip, fixed sight, case colored sidelock & brass ramrod thimbles. The Kentucky will please both the collector & novice alike. Whether you are a die hard or just a weekend enthusiast your fully functional Kentucky will meet your needs.

CLASSIC MUSKETS

Traditions® classic musket rifles are authentic, true reproductions. All models have a high-quality, premium finish on the wood and metal as well as hand-oiled wood stocks. Available in .58 or .69 calibers and approved by the North-South Skirmish Association (N-SSA). Perfect for

R184200

1842 SPRINGFIELD MUSKET RIFLE

Used during the 19th century, the 1842 was the last US smoothbore rifle. It was the first US musket to be produced with a percussion lock and was superior to the flintlock since it was more reliable and resistant to weather. This rifle was used during the American Civil War.

R186100

1861 SPRINGFIELD MUSKET RIFLE

The most widely used rifle during the Civil War, the 1861 Springfield was a favorite due to its' reliability, accuracy, and range. The 40" barrel and .58 caliber allowed for an effective range of 200-300 yards. While difficult to find during the early Civil War years, it became the first rifle produced at such a large scale and its' popularity continues today.

R185303

1853 ENFIELD MUSKET RIFLE

The 1853 Enfield was used in the Civil War by both the North and the South. The Confederates imported more of these guns during the war and towards the end of the war, more than 75% were armed with the 1853 Enfield. It was the second most widely used rifle behind the 1861 Springfield Musket. The original (as with this reproduction) has a 39" barrel and was fastened to the stock with 3 metal bands. This model is also known as the "three band" model.

R186306

1863 ZOUAVE MUSKET RIFLE

The 1863 Zouave rifle was originally produced by Remington Arms under a contract with the US Government. Very few models actually saw action during the Civil War and none were distributed to any army division. However, the Zouave was created to put a more maneuverable firearm into the hands of soldiers and along with its' barrel strength it was also prized for its' overall beauty. The patch box additionally allowed for storage.

CANNONS

Traditions® Cannons are fully operational & accurate in scale & detail. These are perfect for shooting especially around Memorial Day & the 4th of July. Available in a variety of styles & plating, these cannons are sure to be a fun tradition for you for years to come!

1. NAPOLEON III & 5. MINI NAPOLEON III

Reminiscent of the cannon used by the armies of both the North & South during the Civil War. Built in two sizes, each featuring metal-rimmed wheels. Offered in large scale .69 caliber with authentic accessories & .50 caliber mini version.

2. MINI OLD IRONSIDES

British guns proved no match for the deck guns of the U.S.S. Constitution. Our replica features authentically-styled naval carriage & barrel.

3. YORKTOWN

Field artillery came into its own during the American Revolution, notably in General Washington's victory at the Battle of Yorktown. This faithful model features the split-trail carriage that gave our army mobility.

4. OLD IRONSIDES

This model is nearly three times heavier than its' little brother. This .69 caliber has the look & feel of a working piece of artillery.

6. MOUNTAIN HOWITZER

The Mountain Howitzer will be a great addition to any Civil War enthusiast's collection! This mini cannon is reminiscent of the larger version used during various wars but notably during the Civil War. Our replica is smaller, lighter, & fully functional.

BULLETS

USED BY THE PROFESSIONALS:

NEW SMACKDOWN® MZX™ BULLETS

The NEW Smackdown® MZX™ bullet now brings a full-bore option into the performance-driven Smackdown® line of bullets! This series has come to be known as the best muzzleloading projectiles on the market thanks to delivering unparalleled accuracy. The Smackdown® MZX™ full bore bullet is a great choice for those who prefer a sabot-less projectile or may be in a state where you cannot use sabots and don't want to compromise on performance.

SMACKDOWN® BLEED™ BULLETS

With absolutely devastating impact, this bullet creates massive wound cavitation upon hitting an animal. It delivers traumatic force & provides the shooter lower recoil & faster velocities than other bullets on the market. It is lead free & CA compliant. The new & improved Ridgeback™ Sabot has horizontal ribbing & a deeper cup & additionally provides a better gas seal, easier loading, & improved accuracy. Perfect for whitetail deer, small plains game, predators, & hogs.

SMACKDOWN® XR™ BULLETS

Xtreme Range is the name of the game for this bullet. With a high ballistic coefficient, this projectile shoots flatter while maintaining accuracy & hits harder due to the PC tips which maximizes expansion for optimal terminal performance. The new & improved Ridgeback™ Sabot has horizontal ribbing & a deeper cup & additionally provides a better gas seal, easier loading, & improved accuracy. This bullet is perfect for small plains game, predators, elk, & whitetail.

SMACKDOWN® CARNIVORE™ BULLETS

This bullet delivers bone crushing performance on big game & shoots flat with precision accuracy. The polycarbonate tip maximizes expansion without sacrificing weight retention. The new & improved Ridgeback™ Sabot has horizontal ribbing & a deeper cup & additionally provides a better gas seal, easier loading, & improved accuracy. This bullet is the choice for elk, large plains game, whitetail, bear, & moose.

SMACKDOWN® BULLETS DEADLY COMBINATION with Traditions® ultralight barrels.

- + Proprietary green spire point polymer tip.
- + Tapered copper jacket interlocked with lead core for controlled expansion.
- + EZ Load 3-petal sabot provides a superior gas seal & prevents petal overlap when sabot engages bore rifling, resulting in easy load-ability.

NEW SMACKDOWN® .45 CALIBER BULLET

- + .45 caliber.
- + Red spire point polymer tip.
- + Tapered copper jacket interlocked with lead core.
- + Upon impact, tip is compressed causing bullet to expand for terminal performance.
- + EZ Load 4-petal sabot.
- + Sabot fully engages the rifling to keep the bullet centered and allows for maximum velocity and unparalleled accuracy.
